The California Pacific Medical Center Pan Pacific Speaker Series - Thought Leaders in Dermatology

..... presents:

*Neurotoxins: The First Twenty
Years: Comparisons, Safety
and Clinical Outcomes*

..... SAN FRANCISCO

Saturday, September 26, 2009

California Pacific Medical Center • Davies Campus Auditorium
45 Castro Street • San Francisco, CA 94114 • 9:00 am -12:00 pm

This activity is supported by an educational grant from Allergan, Inc.

ALLERGAN

After 13 million treatments over the last two decades, botulinum toxin has shown to be one of the safest and most common nonsurgical procedures performed worldwide. In the United States, there are currently three licensed neurotoxins available with several more under investigation and likely to receive FDA approval in the next few years. While healthcare providers and consumers should welcome this expanding neurotoxin market, there is now an increased responsibility to become familiar with the variations and nuances among these products.

Toward this end, Drs. Vic Narurkar and Rona Silkiss invite you to join them in conversation with pioneers of botulinum toxin for cosmetic use, Drs. Alastair and Jean Carruthers. Together they will outline the differences among neurotoxins with respect to dosing, spread, precision, predictability and onset of results.

On the campus of the California Pacific Medical Center, where botulinum toxin for clinical use was developed, the faculty will compare the various toxins available emphasizing the recent boxed warning and RIMS requirements. Product-specific injection technique will be addressed including currently recommended uses as well as lesser-known cosmetic applications.

This activity has been designed to meet the educational needs of core specialty physicians who are currently or will be performing facial aesthetic procedures using botulinum toxin.

AGENDA

9:00 – 9:30 am	Registration and Breakfast
9:30 – 11:30 am	Formal Presentation
11:30 – 12:00 pm	Question and Answer Session

OBJECTIVES

After completing this activity, the participant should be better able to:

- Differentiate among neurotoxins and their MOA
- Explain the difference in dosage strength (potency) expressed in “Units” among the botulinum toxin products
- Recognize that clinical doses expressed in units are not interchangeable from one product to another
- Identify the potential for adverse effects following administration of botulinum toxins

COURSE DIRECTOR

Vic Narurkar, MD, FAAD

Chair, Department of Dermatology, California Pacific Medical Center, San Francisco, CA and Associate Clinical Professor of Dermatology, University Of California, Davis Medical School

GUEST FACULTY

Alastair Carruthers, MA, BM, BCh, FRCPC, FRCP

Clinical Professor of Dermatology And Skin Science, University Of British Columbia, Vancouver, British Columbia

Jean Carruthers, MD, FRCS, FRC

Clinical Professor of Ophthalmology, University of British Columbia, Vancouver, British Columbia

Rona Silkiss, MD, FACS

Chief, Division of Ophthalmic Plastic Reconstructive Orbital Surgery, Department of Ophthalmology, California Pacific Medical Center, San Francisco, CA and Associate Clinical Professor of Ophthalmology, University Of California, San Francisco Medical School

Limited space available; there are no fees associated with this activity
