The doctor is always in.

Dr. Vic A. Narurkar, MD, FAAD, Cosmetic Dermatology and Laser Surgery

California Pacific Medical Center

The Bay Area is home to innovations in all aspects of technology, including cosmetic dermatology, and Dr. Narurkar has been instrumental in leading pivotal clinical trials in injectables, lasers, and energy-based devices, which are now the gold standards in aesthetic medicine. The Stanford-trained dermatologist has earned worldwide recognition for achieving a natural look with Botox, fillers, and laser treatments. He serves on the board of directors of the American Society of Dermatologic Surgery and has authored over 200 publications, including the respected text *Cosmetic Dermatology*. But what makes Dr. Narurkar most unique is that he personally performs consultations and treatments himself. “Establishing a trusting relationship with patients is a vital part of my philosophy,” he says of his approach. This philosophy has allowed him to build San Francisco’s premier cosmetic dermatology practice, with diamond and black diamond level status for Botox, Juvederm, Fraxel, and Thermage, innovations in noninvasive fat reduction with Coolsculpting and Liposonix, and skin rejuvenation with the Clear and Brilliant Laser. “It is comforting to know that not only does my dermatologist do all of his own injections and lasers, but he also actually developed the parameters and settings for most of them,” explains a patient.
